Summary of Changes

For a summary of the new features that have been included in IBM Z Workload Scheduler Version 10 – Release 1, Modification Level 0, see the section [IBM Z Workload Scheduler version 10.1 enhancements](#) of the *Overview* manual.

Interoperability

This section contains information about the interoperability of IBM Z Workload Scheduler Version 10 — Release 1, Modification Level 0 with:

- Dynamic Workload Console
- IBM Workload Scheduler Agent for z/OS

IBM Dynamic Workload Console

The IBM Z Workload Scheduler Version 10 — Release 1, Modification Level 0 engine requires the IBM Dynamic Workload Console version 10.1.

The Z Connector version 10.1 is automatically installed when you install the IBM Dynamic Workload Console version 10.1.

The Dynamic Workload Console on z/OS requires z/OS version 2.3, or later.

Note: For detailed information about the system requirements, see the *Detailed System Requirements for Dynamic Workload Console version 10.1* at the following link:

<https://www.ibm.com/support/pages/node/6426841>

The z/OS customers can download the IBM Dynamic Workload Console and Z connector software for the z/OS operating system from the following IWM link:
